Amit Dubey, Author, Innovator, National Cyber

Generative AI is hailed as a game changer that will impact and even enrich our personal lives. It is also expected to affect the way we manage businesses and possibly every function within an organisation. While the technology is nascent and the full potential of its applications is yet to be explored, the ability of businesses to adopt this innovation will play on their competitive ability. Some would argue that generative AI will lead to job losses. Leopard Safari: Jhalana Wildlife Sanctuary

5:00 AM - 9:00 AM

Situated right in the heart of Pink City Jaipur, Jhalana is slowly becoming a favourite destination to spot leopards in the wild. Besides the Leopards, you will be able to spot other smaller fauna including striped hyena, spotted deer, blue bulls and wild boars. Palm, babul, bamboo and acacia trees continue to be methodically planted throughout the quartz hills and flat-lands of the Aravalli

that Jhalana is set in. And thus, it is also an ideal destination for migratory birds, despite being in the heart of the city. An open gypsy safari, which takes about 2.5 hours, is the best way to explore Jhalana Forest Reserve. Don't miss the experience!

Note: The distance from the hotel to Jhalana Forest is about 40 minutes. The safari takes about 2 to 2.5 hours to complete. To make the most of it, we recommend leaving the hotel by 5:15 AM. We will make travel arrangements for the confirmed guests.
